AONano Precision Series

Industrial UV nanosecond laser

- < Automatic power optimization
- < Power monitoring available
- < Crystal indexing
- < Automatic power optimization
- < Intracavity clean air system
- < IP65 rating

Features & Benefits:

This is the upgraded version of our AONano Precision-355 laser series. With the intelligent features listed below, the long-term stability of the laser is significantly improved, and the service time/cost is greatly reduced.

The output power of the laser can be controlled by either the PWF parameter in the graphic user interface (GUI) of the laser or the duty cycle of the external PWM control signal. The IP protection level is upgraded to IP65. Advanced features, including crystal indexing, clean air system, and automatic power optimization function enable the long-term stability and reliability of the laser It is the best choice for high precision micromachining, marking-on-the-fly in a packaging line, FPC/PCB cutting and other applications.
